Introducing new types of objects in AutoCAD: There are some new items available in the default objects list. The New Document, Variables, Place objects, and Dynamic Text objects are all available. These objects appear in the default objects list, so you can quickly add them to your drawing. (video: 2:00 min.) Dynamic Text: Text that is changed automatically with the status of another object. This is a real-time version of a static text box. (video: 2:25 min.) The following items are scheduled for AutoCAD 2023 release: Category: Automatic Line Number: The new alignment and offset for line numbers will help to avoid clipping. AutoCAD will ignore numbers and line width to accommodate this change. (video: 2:00 min.) Graphical Cursors: High-resolution, graphical cursors will display more colors, so you can easily pick up a graphical cursor and see exactly which area you are going to select. (video: 2:25 min.) PDF support: There are many commands that work with PDF documents, such as the view PDF command and Print to PDF command. You can now take advantage of these commands with AutoCAD. (video: 1:00 min.) Category: Custom Dynamic Text: You can now create Dynamic Text that is based on a variable. You can assign the variable and create a dynamic text label that changes with the variable. (video: 2:25 min.) Category: Error Definition Assistance: Improved help text will show you the location of the last error. (video: 2:25 min.) Category: Revisions: AutoCAD now provides the information needed to track the latest revision of your model. The Revision Properties dialog box gives you the details of the revisions and the last version to use the revision (rev-last). (video: 1:45 min.) Category: Rotate: The Rotate dialog box includes three new options for rotating, making a mirror copy, and creating a reflection. (video: 2:25 min.) Category: Save As: AutoCAD saves the current drawing as the last drawing file you have used. Now, you can save an instance of your drawing as a separate drawing file to continue working on it. You can continue working on an earlier instance and have the current

drawing file refer to the earlier instance
